PORTAFOLIO

SUMMARY

Systems Engineer specialized in cross-platform software development, process automation, and high-impact technology solutions. Specialist in building dynamic and native interfaces using ReactJS, Flutter, and Dart, with strong proficiency in Python, Java, and JavaScript. Experienced in designing relational and NoSQL data architectures, as well as implementing neural network models and automated workflows. Accustomed to working with Git/GitHub under Agile and traditional methodologies to optimize processes and solve complex problems.

WORK EXPERIENCE

Systems Engineering Intern | Unidad Oftalmológica de Caracas

Aug 2025 - Aug 2026

- Designed and developed an internal process automation system for a clinical environment, optimizing information management and drastically reducing manual workflows for medical report and study distribution by 35%
- Implemented an intuitive and dynamic desktop interface using React and Electron, facilitating efficient visualization, management, and digital delivery of medical reports.
- Built the solution's backend using NestJS as the core logic engine, integrating a NoSQL database with MongoDB to ensure secure, organized, and scalable data modeling.
- Designed and configured n8n workflows for WhatsApp automated responses, streamlining direct communication with patients and ensuring immediate delivery of information.
- Managed version control and the software development lifecycle using Git and GitHub, ensuring code traceability and organized integration of new features.

SKILLS

- **Programming Languages:** Python, Java, JavaScript, Dart
- **Frontend & Mobile:** ReactJS, Flutter (Dart)
- **Databases & Frameworks:** PostgreSQL, SQL, MongoDB, Firebase, Supabase, NestJS
- **Backend:** REST APIs, Data Modeling, Frontend Integration
- **Version Control:** Git, GitHub
- **Data Analysis:** Excel, Power BI
- **Methodologies:** Scrum, Waterfall
- **Languages:** English (B1 / EF SET B2), Spanish (Native)
- **Problem Solving:** Code debugging expertise and root-cause identification for system failures (e.g., website views, database performance).
- **Soft Skills:** Teamwork, effective communication, proactivity in driving improvements, fast learner, time management, perseverance, and commitment.

EDUCATION

B.S. in Systems Engineering Universidad Metropolitana	Sep 2019 - Oct 2026
Power BI Data Modelling Basics Tutorial Course Simplilearn. Duration: 3 hours.	Jul 2026
How to Program Applications from Scratch HoyAprendo	Mar 2026
EF SET English Certificate (B2 Upper Intermediate) EF SET	Mar 2026
Minor in Software Development Universidad Metropolitana	Nov 2025
Youth Leadership Course Special Olympics Venezuela. Duration: 6 hours.	Jul 2025
Data Science Fundamentals Course International Bussiness Machines Corporation. Duration: 7 hours.	Nov 2024
High School Diploma Colegio Emil Friedman	Sep 2014 - Jul 2019
